## Summer Hours

### Summer Student

The Town of Rocanville is seeking a seasonal, full time employee to work with the public works department from May 14th to August 31st, 2018.

**The successful applicant will take pride in the community's appearance and most importantly, have initiative.** Experience with light equipment and its maintenance is an asset.

For more information or an application form, please contact the Town Office at 306-645-2022. [Rocanville.town@sasktel.net](mailto:Rocanville.town@sasktel.net).

### Drinking Water Quality and Compliance Annual Notice to Consumers Town of Rocanville

#### Introduction

The Water Security Agency and the Ministry of Environment requires that at least once each year waterworks owners provide notification to consumers of the quality of water produced and supplied as well as information on the performance of the waterworks in submitting samples as required by a Minister's Order or Permit to Operate a Waterworks. The following is a summary of the Town of Rocanville's water quality and sample submission compliance record for the January 1 – December 31, 2017 time period. This report was completed on April 17, 2018. Readers should refer to Water Security Agency's Municipal Drinking Water Quality Monitoring Guidelines, November 2002, EPB 202 for more information on minimum sample submission requirements and the meaning of type of sample. Permit requirements for a specific waterworks may require more sampling than outlined in the department's monitoring guidelines. If consumers need more information on the nature and significance of specific water tests, for example, "what is the significance of Selenium in a water supply", more detailed information is available from:

[http://www.hc-sc.gc.ca/ewh-semt/pubs/water-eau/index\\_e.html](http://www.hc-sc.gc.ca/ewh-semt/pubs/water-eau/index_e.html).

#### Chemical – Health Category

All waterworks serving less than 5000 persons are required to submit water samples for SE's Chemical Health category once every 2 years. The Chemical Health category includes analysis for arsenic, barium, boron, cadmium, chromium, fluoride, lead, nitrate, selenium and uranium.

The last sample for Chemical Health analysis was submitted on August 24, 2016. Sample results indicated that the provincial drinking water quality standards were not exceeded.

The last sample for General Chemical analysis was required on 2014 and submitted on August 24, 2016. Sample results indicated that there were no exceedences of the provincial aesthetic objectives for the General Chemical category.

**More information on water quality and sample submission performance may be obtained from:**

**DID YOU KNOW?**

**Local Businesses Can Help Lower Taxes.**

More efficient land use and more central locations mean local businesses put less demand on our roads, sewer and safety services. They also generate more tax revenue per sales dollar. The bottom line: a greater percentage of local independent businesses keeps your tax dollars lower!

## DONATIONS GRATEFULLY ACCEPTED

The Aquatic Centre is a hub of training and recreation for our town. There are a large number of children in our school taking swimming lessons they may never have taken if it wasn't for this being offered through a school program. Rocanville has had many young people further their careers in aquatics or related fields because of the training they have received at our pool. Many programs are offered from swimming lessons, aquatic exercise, lifesaving skills, water sports, and even some water therapy for those recovering from medical issues. People travel to Rocanville from other communities around to take part in these activities since we have a unique INDOOR facility.

The town and RM have recently taken on a project to correct the flow of air in the facility to reduce the humidity in the building, however The Rocanville Aquatic Centre is facing some other large expenses going forward as the building is now nearing 50 years of age. As is visible from the outside of the building, we need to redo the roof at a cost of approx. \$70,000, the pool tank is in need of a new liner or major repairs in the near future at an estimated cost of \$106,000 plus taxes, the upper mezzanine has been out of use for the past couple of seasons due to the floor which is in need of replacement...a verbal estimate given was in the neighborhood of \$50,000 to repair using a material that would be long lasting and low maintenance. These are the needs but we have a list of wishes too, to enhance the facility such as an outdoor deck and green space so people can have the best of both worlds....and indoor pool with sunshine and fresh air.

We continue to fundraise and apply for grants, but as you may be aware the board consists of a small group of people who can't do it all so any amount of donation to these projects would be greatly appreciated. We thank you in advance for any amount you are willing to give. Receipts will be issued for tax purposes for any amount \$20 and over

(\$100 and up Bronze level sponsor, \$500 and up Silver level, \$1000 and over Gold level sponsor  
Donations larger than \$5000 will be individually recognized.)

## Moving forward without moving out

**Accessing your home equity can help boost your retirement income, ease pressure on your pensions and investments, and help you stay put.**

*In a recent survey of Canadian homeowners, only four in 10 respondents were confident they would have enough savings to maintain their lifestyle when they retire. One reason maybe that, for many, a significant portion of their wealth at retirement is tied up in their home. And selling their house to free up that money simply isn't what they want to do.*

If that sounds like your situation, you may want to consider accessing the equity in your home to help boost your retirement income. One of the most common ways to do this is through a secure line of credit (also called a home equity line of credit). A secured line of credit lets you borrow what you need, when you need it, at a very favorable interest rate because your loan is secured, or guaranteed by your home.

In addition to helping you stay in your

home longer, there are other potential advantages. When you access your home equity:

-Your withdrawals are tax-free unlike withdrawals from registered accounts such as Registered Retirement Saving Plans and Registered Retirement Income Funds.

-You may be able to avoid cashing out to the investments and locking in losses when markets are volatile.

-You can ensure ready availability of funds to meet unexpected home or health care expenses.

-You can reduce the cost of other debts by transferring those balances to the secured line of credit (if the interest rate is lower than your other loans)

Keeping in mind that you may need to have enough cash flow from other sources to cover the monthly interest payments on the secured line of credit. To protect yourself and keep interest costs

from becoming a burden, it's a good idea to put a cap on the amount you borrow- for example, 20 percent of the value of your home.

Your home is an important asset that should figure in your overall retirement planning. Speak with your Advisor to find out how well this approach fits your personal situation. And plan to enjoy your retirement knowing that reaching this milestone with less saved than you hoped for doesn't necessarily mean you need to sell the home you love.

2016 Manulife Bank Homeowner Debt Survey, [www.manulifebank.ca/debtresearch](http://www.manulifebank.ca/debtresearch). The Manulife bank of Canada poll surveyed 2,373 Canadian homeowners in all provinces between the ages of 20 and 59 with household income of more than \$50,000. The survey was conducted online by Research house between February 3 and February 20, 2016. National results were weighted by province, income and age.
