How to manage finances on a single income.

In 2016, one-person households became the most common living arrangement in Canada for the first time, accounting for 28 per cent of all households and representing 4 million Canadians.[1] The number of people living alone between 35 and 64 has increased faster than other age groups, so the trend is not limited to the younger or older ends of the adult spectrum.[2]

The shift to one person households can largely be attributed to Canadians marrying later in life, divorcing more often and living longer.[3]

Singles are feeling the squeeze

People who live alone have a unique set of financial challenges. Most single Canadians are on the hook for 100 per cent of their living expenses and have no partner to fall back on financially should they lose their job or become ill or injured. They often have fewer tax planning opportunities, such as income splitting or family tax deductions, and may delay saving for retirement because they spend their money on more immediate financial needs.

Understandably, some solo dwellers feel their paycheques are stretched to the limit. Housing affordability is a major concern. According to the 2016 Census, 41 per cent of one-person households spent 30 per cent or more of their average monthly household income on rent or mortgage payments.[4] A recent survey found that 46 per cent of those living alone said they struggle to save for retirement while managing day-to-day bills, since they have to cover all their expenses on a single income.[5]

Financial basics for solo living

With careful planning, Canadians who live alone can support themselves financially – and still be able to save for their financial goals. Here are some tips.

Set up an emergency fund

One of the first things to consider is starting a fund to cover you in case of a financial setback. A small amount put aside with a weekly or monthly automated payment on payday will grow to a healthy balance quickly (aim for three to six months of expenses), and you'll barely notice the reduction on your paycheque. A non-registered savings account that pays high interest without locking in your money is a good option. And while you don't want to have to rely on credit cards in an emergency, you could consider opening a line of credit, which would typically charge a lower interest rate. Call us to get the best high interest savings account and also a secure line of credit, this area is also part of or financial planning expertise.

Create a budget

It's tempting to travel and dine out, or indulge in other social activities, when there's just one set of needs and wants to consider. A budget helps avoid the pitfalls of overspending and can show you how you might be able to reallocate funds towards savings. An array of budgeting apps, tools and worksheets is available to help you get closer to your financial goals –we as your Advisor are here to help too.

Consider insurance

Because singles depend so heavily on their ability to earn a pay cheque,

income protection such as critical illness, disability or supplemental health and dental insurance could be more beneficial than life insurance. Should an unexpected illness or disability arise, income replacement protection could help provide an income to someone who is unable to work, so they can manage their expenses with less worry and focus on getting better. We can help you determine which type of insurance is most suitable for your situation.

Plan for retirement

Start as early as you can and keep investing – even if it seems difficult. Longer-term investing gives you a longer period of potential investment growth, and even small deposits can add up quickly. Contributions toward your Registered Retirement Savings Plan (RRSP) and/or Tax-Free Savings Account (TFSA) can help with tax efficiency and should be included in your budget. Let us know if you would like to start a RRSP or TFSA today.

**On Being Women -
 Finding Your Superpowers**

This interactive workshop will feature pragmatic
 strategies to your health and wellness, and ulti-
 mately to find your superpowers. They will touch on
 nutrition, hydration, sleep, movement, and how
 all of this plays into the mental/spiritual wellness
 necessary to keep us going as moms, daughters,
 wives, and partners every day.

Christa Lee Froese:
Journey to Joy

Christa Lee Froese is a journalist and author by the strictest
 definition. But the true description of her goes more like
 this: Mother. Writer. Creator. Sufferer. Seeker. After a nervous
 breakdown eight years ago, Froese was left to reconstruct
 life as she had created it. She took on a homemade joy pro-
 ject that saved her life and turned into the bones for her first
 book ... Journey to Joy. The humour-laced memoir brings to
 life this prairie woman's recovery from depression & anxiety,
 following Froese on her two-year joy project to restore her
 well-being.
